(1) Includes the CIE Maroc factory in Morocco.

- One-stop shop for customers, offering the whole range of the existing technologies to produce components.
- Enabling the selection of the technology that better fulfils the changing needs of our customers.
- Allowing us to focus investments on more demanded technologies.

TURNOVER*
BY VEHICLE AREA
2025

* Proforma 2025 including CIE Aludec (Branding), closed in March 2026.

- ≈80% of CIE Automotive's sales are powertrain agnostic.
- A third part of ICE sales come from regions of slow electrification pace (i.e. Brazil, India).

- The electrification pace is completely different by geographies, which allows a more gradual evolution of the product portfolio to global players like CIE Automotive.

- Penetration of xEV in CIE Automotive's portfolio and sales is significantly higher than penetration of xEV in our market: $\approx 31\%$ of CIE Automotive's sales are related to xEV.

- Portfolio's electrification is a natural process of our customers' demand, which CIE Automotive can address thanks to globalization, multi-technology and financial strength.

- In 2025 $\approx 30\%$ of the new orders were for xEVs.

COMMERCIAL STRATEGY

Working in xEV for incumbent OEMs, while having already started working for the new EV players.

Gradual portfolio's electrification in a context of 20% of sales renewed annually.

PRODUCT STRATEGY

Already positioned in areas like battery, motor and electronics, just waiting for higher volumes to come.

No need of additional capex for the electrification of our portfolio.

* Market weighted with CIE Automotive's FY 2025 geographical weights.

Focused on the integration of the newly acquired companies

- Excellent operational execution in a challenging environment
- Balanced and sustained profitability at both global and local levels
- Strong operating cash flow generation supporting growth
- Strengthening of the balance sheet with a well-balanced financial structure
- Strong commitment to shareholders

- The first half of 2026 confirms the Company's operational and financial strength as it advances into this new phase following the successful completion of the 2021–2025 Plan
- The **2026–2027 Guidance** remains a clear roadmap based on disciplined execution, selective investment, and profitable growth, aimed at sustained value creation

CIE AUTOMOTIVE IN STOCK EXCHANGE

- Share price performance
- Analysts' recommendations

⁽¹⁾ STOXX Europe 600 Automobiles & Parts includes: OEMS: BMW ST, Mercedes Benz Group, Ferrari NV, Stellantis, Porsche, Renault & Volkswagen.
SUPPLIERS: Forvia, Michelin, Continental, Nokian, OPmobility, Rheinmetall, Valeo.

The share price closed the first half of the year at €26.7, compared with €29.8 at year-end 2025. After recovering part of the lost ground during April and May, the correction recorded in June brought the share price back to levels similar to those observed at the end of the first quarter (€26.9).

This performance should be understood in the context of heightened volatility in financial markets, marked by the macroeconomic, geopolitical and sector-specific uncertainties that influenced market performance throughout the first half of the year.

Despite this backdrop, **CIE Automotive continues to deliver excellent results**, confirming its strength and consolidating its position as one of the most profitable companies in the sector.

The strong disconnect between stock market performance and the Company's solid fundamentals remains evident. Analysts support this view, with an **average target price of €35.4, well above the current share price, and with several analysts already approaching €40.**
